Slabs of slate are used for paving stones and flooring, for lining walls, for billiard tables, electric switchboards, and blackboards. The chief slate quarries are in Pennsylvania, Vermont, Maine, Maryland, Virginia, and New York. Granite is one of the hardest and most durable stones. It is used for buildings and monuments. There are large granite quarries in Vermont, Massachusetts, Maine, New Hampshire, California, and several other states. Sandstone is found in many states. The leading sandstone states are New York, Ohio, and Pennsylvania. Limestone is the most widely distributed of the building stones. The most valuable limestone for building purposes is the Oolitic limestone of Indiana. Limestone is crushed for making stone roads, and large amounts are used for making lime and cement, and in the manufacture of pig iron. Portland Cement. Cement is made from limestone and clay. It is used to make...
