

Transactions of the American Institute of Mining Engineers Volume 20 (Paperback)

By American Institute of Engineers

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: .35,000 barrels. Discussion. In reply to the question, whether his investigations in the Florence field had given any evidence concerning the origin of the petroleum, as animal or vegetable, Mr. Eldridge said: I omitted that topic from my paper, because I could throw no light upon it. The oil has not a strong odor. The formation contains animal remains in abundance, and through the fossiliferous lime-concretions there are many minute traces of plant-life, such as stems or particles of bark. As seems to be the case in most oilbearing formations, nearly all evidence of life, except of animal, life, has disappeared. The formation contains no coal in this locality, but coal is found in it at several localities in the West. F. H. Newell, Washington, D. C: Mr. Eldridge's paper throws some light on the subject of prospecting for oil. In the western fields...
