Oxford University Press, 1997. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service!

Summary: A monumental, state-by-state survey of American architecture, the Buildings of the United States series celebrates the rich geographic, cultural, and economic diversity of the country. Commissioned by the Society of Architectural Historians, it records and illustrates the architecture of the urban, suburban, and rural United States, both historically and in hundreds of photographs. From pre-Columbian ruins to modern skyscrapers, from churches, courthouses, and theaters to factories, barns, and gas stations, the works of national and international masters of American architecture, as well as works wrought by unknown hands, are documented in these exceptional volumes. The series, hailed by Edwin McDowell of the New York Times as "one of the most ambitious in publishing history," is destined to become a national treasure. The most authoritative reference available on our architectural heritage, Buildings of the United States will be a delight to the general reader and traveler as well as an indispensable source book for scholars and students of architectural history, preservation, and urban planning. This fifth volume in the Buildings of the United States series charts the architectural history of Colorado--the nation's highest...
