Date :2008-05-01 1st edition 1st printing 2008-05-01 This comprehensive textbook describes the biochemical basis of the basic theory and experimental techniques. Divided into biochemical experiments theory and technology. experimental part of the content and Appendix 3. Principles and techniques of biochemical experiments in the general principles of biochemical experiments and centrifugation. spectrophotometry. chromatography and electrophoresis techniques were more systematic and comprehensive introduction. Selected experimental content of 35 projects. some of our students both the traditional test of basic skills training. and also increased the design of integrated experiments. This book is rich in content. to explain in layman s language. has a strong practical. Contents: Preface first principles of biochemical experiments and technical preparation of the first chapter of biochemical characteristics and principles of separation of biological and chemical separation and preparation methods of Section II of the biochemical characteristics of the principle of separation of Preparation Section biochemical separation and preparation methods of analysis identified the fourth biochemical separation and preparation of materials section the choice of methods to extract V biochemical separation and purification separation and preparation methods of selecting the second chapter section separation and preparation of biological macromolecules extraction and separation of protein and an enzyme. protein and enzyme extraction method two general . proteins and enzymes extracted purified nucleic acid extraction and separation of a Section. and the solubility of two nucleic acid extraction method of Section III and other water-soluble polysaccharide extraction and separation of biochemical substances in the extraction and separation of fatty compounds IV V Extraction of plant secondary biological separation of the solvent system used to select the third chapter of Biochemistry...
