Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

Not illustrated. 1918 Excerpt: .their 37th annual report for the year 1915, were used. From each of these values the water areas of rivers, lakes and great ponds within the exterior boundary lines were deducted. Areas of rivers were measured from the best obtainable plans on file in this office, made from actual survey, using also, in some cases, various plans on file in other State departments. Plans of lakes and great ponds were measured from surveyors large scale plans where obtainable, many being furnished by various city and town officials. Some, notably water supply reservoirs, were obtained from information on file with the State Department of Health or from local engineers. All other ponds were measured as shown on the original plane table sheets of the State topographical map, scale 1: 30,000, or four times the area of the State maps themselves. Ponds crossed by town lines were divided in the proper proportions. Brooks and small ponds were not considered, except in a very few scattering instances, where population was very small. In the case of cities and towns along the coast, basic gross areas are taken to high-water line only, and in tidal streams to the first bridge from the mouth of the same. The sum of the areas as thus determined for the several cities and towns, viz., 7,876.2528 square miles, was then taken as the area of the State. This figure differs from that used by the United States Census Office, which gives the land area...
